58	2/19/2021	Tommy	Juan Sebastian	https://github.com/jshoyos/soen390-team01/issues/58	In the User Management module, updating a user once breaks the Edit modal. After the modal is closed on the first edit, clicking on the Edit button again does not make the modal visible again, preventing the module user from modifying the entry multiple times.	Start the application Sign in Go to the User Management tab If not there is no user in the table, use the Add User form Click on the Edit button for a user in the table Modify a field's value in the modal and click on Update You can now no longer bring back the Edit modal	Open
71	2/24/2021	Juan Sebastian	Juan Sebastian	https://github.com/jshoyos/soen390-team01/issues/71	When trying to modify a user with some invalid information (i.e removing the name or leaving a field empty) the validation will work but the modal view won't pop up again and the user will disappear from the user's table until we refresh the page. this might be linked to the modal view bug already existing	Go to UserManagement Click on Edit of any desired user Delete the name or any other field Click on Update The modal view will disappear and the user won't appear in the table leaving a big blank space	Open
68	2/23/2021	Ashwin Philip	Juan Sebastian	https://github.com/jshoyos/soen390-team01/issues/68	In the User Management module, it is possible to add a new user, having a password of less than 6 characters. The user is then added to the database but not to firebase. As a result, the newly added user is displayed in the User Management module but it will be impossible to log in with the added credentials.	Start the application Sign in Navigate to the User Management tab. Fill in the fields, make sure the chosen password has less than 6 characters. Click on "Add User". Now return to the login page and attempt to log in with the credentials that were just added. It will be impossible to login.	Closed
32	2/2/2021	Juan Sebastian	Kevin Marsolais	https://github.com/jshoyos/soen390-team01/issues/32	It is not possible to create or log in with account information that has a password length of fewer than 6 characters. Nothing happens after pressing login, it stays on the login page.	Go to the login page Enter username: Kmarsolais@hotmail.com Enter password: test1 Click Login Nothing will happen no validation	Closed
57	2/18/2021	Tommy	Tommy	https://github.com/jshoyos/soen390-team01/issues/57	Failing tests don't make the Build and Test check fail in the Github pipeline for Pull Requests.	Introduce failing test(s) in a branch Commit and push to the remote Create a Pull request, which triggers the pipeline execution When the pipeline execution is completed, the tests fail, but the PR is still marked as valid	Closed
74	2/24/2021	Juan Sebastian	Juan Sebastian	https://github.com/jshoyos/soen390-team01/issues/74	sonarcloud reports 2 code smells. Please check how they could be fixed and fix them	N/A	Open
75	2/24/2021	Juan Sebastian	Juan Sebastian	https://github.com/jshoyos/soen390-team01/issues/75	Sonar Cloud reports 4 code smells in EncryptionService and 5 in userManagementService. Please take a look a these code smells and how to get rid of them	N/A	Open
76	2/24/2021	Juan Sebastian	Noah	https://github.com/jshoyos/soen390-team01/issues/76	InventoryService seems to have a lot of code smells please look at it and improve the code quality	N/A	Open
77	2/24/2021	Juan Sebastian	Noah	https://github.com/jshoyos/soen390-team01/issues/77	Look at the solarcloud to reduce the code smells/bugs in the views	N/A	Open
78		Noah	Noah	https://github.com/jshoyos/soen390-team01/issues/78	When trying to apply multiple filters to the inventory view it only selects the most recent filter.	Go to InventoryManagement Click on multiple Filter option Select desired values The table will display the most recent filter selected.	Open
